

88 North, Munich

LEED Gold certification

88 North, Munich Facts and Figures

With SOMMER façade solutions, architects' designs and plans become reality

The design of 88North is by star architect Hadi Teherani. Mullion/transom facades, window elements, sheet metal and louvre cladding as well as doors were supplied for this project. The facades were constructed using the SOKALTHERM® and MULTITHERM® systems. In addition to the building physics requirements, the systems meet all design requirements, such as different width profile face widths, sash variants and structural glazing solutions. The building has LEED Gold certification.
