

Army Lodge, Wiesbaden

Highest security standards

Army Lodge, Wiesbaden

Facts and Figures

Special solutions are developed and implemented for the Army Lodge. Due to the increasing number of bomb attacks in Europe and the Arab world, SOMMER developed facade products that protect against the deadly danger. With our own profile series, architectural specifications can be implemented down to the last detail. SOMMER products are developed and manufactured according to the respective country-specific standards and guidelines. For the Army Lodge in Wiesbaden, Germany, the A-T-F-P facade was used, a solution specifically for US Army facilities. The facade meets the highest technical standards and also fulfills various pressure wave inhibiting requirements for protection in the event of terrorist attacks.
