

Victoria House, Düsseldorf

Facade design of the Victoria House

Victoria House, Düsseldorf

Facts and Figures

The Victoria Insurance Company has completed the extension of House 4 of the Victoria House in Düsseldorf, an ensemble that has shaped the cityscape

SOMMER's task was to adapt the facade design. Especially in the area of the neighbouring Künstlerhaus, the facade had to be realised with anti-reflective glass. The glazed atriums connect the individual buildings into a cohesive unit. The prefabricated element facade made of natural stone was installed, thus ensuring the tightness of the building.

CLIENT

Victoria Haus 4.BA GmbH & Co. KG, Ratingen
