

**Goethe University**, Frankfurt on the Main  
Special profiles for special requirements

# Goethe University, Frankfurt on the Main

## Facts and Figures

The large volume of the Faculty of Humanities and Educational Sciences building is divided by two six-story building sections that are shifted against each other.

The large-scale glazing of the SOMMER window elements allow exciting views of the campus and a high degree of transparency. In combination with the light-colored natural stone cladding, the element façade structures the building envelope in an unobtrusive and unagitated manner. The overall impression reflects the purpose of the building to house the „NormativeOrders“.
