

Detention centre, Luxembourg
Correctional facility with smaller housing units

Detention centre, Luxembourg

Facts and Figures

SOMMER manufactured and installed around 1,600 doors for the correctional center, which include fire protection, smoke protection, detention room and shaft room doors. The opening took place as part of a modernization of the penitentiary system and is helping to improve detention conditions.

The new correctional center, built on an 8.6-hectare site in the municipality of Sanem, can accommodate 400 male pre-trial detainees and around 350 employees. With its overall hexagonal shape, the complex meets the organizational and security requirements of the Prison Service.
