

The Westlight, Berlin

Unique architecture - Budapester Straße

The Westlight, Berlin

Facts and Figures

The ‚Westlight‘ office building is located in the west at one of Berlin’s premium locations.

The 60-metre high new building scores with flexibly designed office space, a future-proof interior and inspiring outdoor spaces. The building was built to the highest standards and certified LEED Gold. The modern ventilation system, opening windows, an effective double facade with integrated sun protection, fast heating-cooling ceilings, lifts and fast data cables should be noted here. All this contributed to the fact that this building offers working space for the future. The surrounding area with its historic parks, modern architecture, very good residential locations and famous landmarks is also unique.
