

University hospital, Jena
One of the most modern hospitals in Germany

University hospital, Jena

Facts and Figures

The project is one of the largest new hospital buildings in Germany. It offers space for a total of 15 clinics and institutes on around 50,000 m² of floor space. Space for 710 beds and 12 operating rooms has been created in several parts of the building. In two construction phases over the past few years, all somatic disciplines, almost all clinically relevant diagnostic services and a large part of clinical research have been combined at the site in Jena-Lobeda, as a result of which the various disciplines now work even more closely together. Patients and staff no longer have to drive or be driven across town. This has significantly improved the quality of care for patients, especially due to the close proximity.

CLIENT

University hospital, Jena

GENERAL CONTRACTOR

Ed. Züblin AG, Direktion Mitte, Jena

EXECUTION PERIOD

March 2019 until May 2020

PRODUCTS

- Aluminium/glass/steel facades
- punch windows
